BINDS THE SEQUENCE ELEMENT 5'.

YCYCGYCR-3' IN THE ZEBERA BLEMENT OF TZ. PROBABLY ALSO FUNCTION

AS A RECEPTOR FOR A YET UNKNOWN LIGAND.

AS A RECEPTOR FOR A YET UNKNOWN LIGAND.

SUBUNIT: WONOMER; FORMS A COMPLEX WITH FTZ.

SUBCELLULAR LOCATION: Nuclear.

TISSUE SPECIFICITY: EXPRESSION IN THE PARASEGMENTAL PRIMORDIA OF THE EMBRYONIC BLASTODERM.

OF THE EMBRYONIC BLASTODERM.

DEVELOPMENTAL STAGE: FIRST APPEARS IN BLASTODERM EMBRYOS. IT IS ABSENT IN SUBSEQUENT EMBRYO STAGES, AND THEN REAPPEARS IN LATE EMBRYOGENESIS TO BE FOUND IN LARVAE, PUPAE AND ADULTS.

NEMEROPERATOR OF THE NUCLEAR HORMONE RECEPTOR FAMILY.

INDUCTION: Both isoforms require ecdysone for activity. Isoform
also requires ecdysone-induced proteins for maximal expression.
SIMILARITY: BELONGS TO THE NUCLEAR HORMONE RECEPTOR FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       L; U01088; AAA19976.2; -.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  onschker B., Heisenberg
PUNCTION: ESSENTIAL PROTEIN THAT MAY FUNCTION AS A TRANSCRIPTION REGULATOR. FLIES WITH L(1)OMB MUTATIONS SHOW SEVERE MALDEVELOPMENT OF THE OPTIC LOBES, REDUCTION IN WING SIZE AND AN INCREASED ABDOMINAL PICHENTATION. THEY DIE DURING THE PUPAL STAGE.

SUBCELLULAR LOCATION: Nuclear (Potential).

TISSUE SPECIFICITY: IN THIRD-INGTAR LARVAE IT IS FOUND IN THE BRAIN REGION THAT WILL DEVELOP INTO OPTIC LOBES AND MORE WEAKLY IN THE THORACIC PART OF THE VENTRAL GANGLION.

THE THORACIC PART OF THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF EXPRESSION ARE: MIDDEVELOPMENTAL STAGE: THE PEAK PERIODS OF THE PEAK PERIODS OF THE PEAK PERIODS O
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Natl.
